(54) HOMEOSTASIS MAINTENANCE EVALUATION DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a homeostasis maintenance evaluation device capable of correctly evaluating and measuring whether or not the homeostasis maintenance of a vital sample is normal.

SOLUTION: The total measured biological signal (b) is obtained by measuring the total biological information (a) including at least two biological signals of a sample 1 to be examined by a total biological measurement part 2. A total biological evaluation information (c) is obtained by evaluating the balance of the homeostasis maintenance of the sample 1 from the total measured biological information (b) by a total biological evaluation part 3. The total biological evaluation information (c) is displayed as a result of the homeostasis maintenance evaluation on the sample 1 by a total biological evaluation result display part 4.

LEGAL STATUS

[Date of request for examination]

17.03.2006

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
